

## English abstract

Valdibrucia is a place located in the eastern end of Tuscany. It's in the municipality of Badia Tedalda, at an altitude of 820m, at approximately 60 km from Rimini, San Marino, Arezzo, Urbino.

Valdibrucia is the only group of houses in a closed valley. It is surrounded by forest, pure virgin nature and has its own excellent spring water.

These houses were abandoned in 1975. Now they belong to Pierre Pellizzari and are managed by an association called Arcadinoi. Our desire is to develop a place for rejuvenation and healthrestoration. We apply some detoxination protocols (most are coming from the teaching of Dr. Hulda Clark), we have a Dotolo colonic machine and we use only raw and organic vegetarian food. We are of course available for massage, detoxination, relaxation, cooking classes, etc.

Right now we restored approx. 900 sq.m. and have a receptive capacity for approx. 40 people. We are left with another 900 sq.m. to restore, but our finances are now down.

Regarding the Energy, we have a production capacity of 15 kW per hour due to 80 sq.m. of photovoltaic panels and a 3.5kW wind generator.

Other more general information can be understood from the Italian text of the website.
